(b) the wall as a function of s
tensor-network wall (first failing N)
entropy growth s per added particle (bits)
slope of the sharing law (saturating $\bar{S}_1$)
grid, d = 1200
modes, d = 20

sharing, $\bar{S}_1$ keeps growing
sharing, $\bar{S}_1$ saturating (fit)
sharing, $\bar{S}_1$ saturated at N = 6
budget, d = 1200 (grid)
budget, d = 20 (modes)
budget, d = 1200, χ(10^−3) charged
